3.2 Notice: The maximum lifetime of the Magnum rescue system (hereafter RS Magnum) depends on compliance with all conditions and instructions specified in the Installation and user's manual for RS Magnum. In particular, it is necessary to observe the service interval of the RS Magnum, that depends on the production date and the service date marked on the RS Magnum label. If the RS Magnum has not been serviced/inspected within the specified period and therefore does not have a valid TECHNICAL INSPECTION, the manufacturer is not responsible for the function of this RS Magnum and in the event of an emergency, the manufacturer has no responsibility for any damage to health or property.
Failure to observe these service intervals has a negative impact on the overall lifetime of the RS Magnum.

4. Approval: This service bulletin indicates a change in the maximum lifetime of the RS Magnum, as an insignificant change of the technical conditions for the use of the RS Magnum. This was approved by the Stratos 07 Design Department.

5. Notification: Notice for users in writing form on website Stratos 07 and sending a Service bulletin No. 13/2023 to the authorities concerned.

6. Validity: from 1.9.2023.

7. Date of issue: in Prague, August 28, 2023
